- Program Control Assignments ..... D-4

The objects listed in this Appendix are current with operating system version 1.01. Your K2600 probably has version 1.01 objects installed. Here's how you can check the version of the objects you have installed:

1. Press the **Master** mode button to enter Master mode.
2. Select the Intonation parameter.
3. Change its value to **19**. You should see something like this: **19 Obj C1.00**. This "intonation table" is actually the version number of the K2600's basic object file (hence the C). If you scroll higher in the list, you may see other version numbers, depending on the ROM block options you have.

If your instrument doesn't have version 1.01 objects, you can get them from our website:

### Program Control Assignments

# Program Control Assignments

The preset programs in the K2600 Contemporary ROM option are organized by category. You can either use them as they are or as a good starting point for your own work. There are many ways to put expressivity and variety in a single program by assigning controllers to the various DSP functions in its layers. This list describes how each of the preset programs can be modulated or altered by various controllers. Only those control assignments that may not be immediately evident are listed. Control assignments like attack velocity and keynumber apply to most programs.

Prg ID	Program Name	Mod Wheel	Data	MPress	Comments
<b>Pianos</b>					
794	Water Piano	Vibrato	Wet/Dry mix	Vibrato
