

# Appendix F

## Live Mode Objects

### Live Mode Programs

740	LM VirtualDesk 1
741	LM VirtualDesk 2
742	LM EQ Room Hall
743	LM TubeAmp+ Gtr
744	LM Synth Sliders
745	LM EQ Stlm Hall
746	LM ParaFlange
747	LM EQ Overload
748	LM Filters
749	LiveMode Default

The objects listed in this Appendix are current with operating system version 1.01. Your K2600 probably has version 1.01 objects installed. Here's how you can check the version of the objects you have installed:

1. Press the **Master** mode button to enter Master mode.
2. Select the Intonation parameter.
3. Change its value to **21**. You should see something like this: **21 Obj L1.00**. This "intonation table" is actually the version number of the K2600's basic object file (hence the **L**). If you scroll higher in the list, you may see other version numbers, depending on the ROM block options you have.

If your instrument doesn't have version 1.01 objects, you can get them from our website:
