

TAPCO 6306 ERRATA SHEET

An Apology:

It is with some sadness, and with humble heart, that we must report an error in the Tapco 6306 compact mixer owner's manual.

Each manual is meticulously researched and hand-crafted using the finest materials, inks and technical writers, and yet somehow this error has been overlooked, and we are truly sorry. Very sorry, just so very-very sorry.

It turns out that the technical writer responsible for the owner's manual was going through a tough time. In fact he wrote the manual while under the distinct impression that he was an analog-to-digital converter circuit board. He could often be seen under his desk, curled up in a ball, reciting the parts list from the service manual of a classic Mackie 1604 mixer.

His therapy and calibration sessions have been working, and now he just believes he is C101, a 63 microfarad, 60 volt electrolytic capacitor. Hopefully, he will soon make a full recovery (or he may be discharged).

The Correction:

On Page 17: 4th paragraph down, the words "Lemon Bunt Cake" should be replaced by the words "Lemon Bundt Cake."
