License Control Version 5.0.0.1

Release Date

Mac/Win 2006-02-10

New Features

Mac/Win **License Control:** License Database updated.

License Control Version 5.0.0.0

Release Date

Mac 2006-02-06
Win n/a

New Features

Mac **License Control:** Support for Mac OS X running natively on i386 architecture. License Control components include "Universal Binaries".
Running both natively (i386) and emulated (ppc in Rosetta) protected programs simultaneously is **not supported** yet.
To run protected ppc programs within Rosetta emulation, set file "Synsopos" which is located in "/Library/Application Support/Syncrosoft/pos/" to "Open using Rosetta".

Mac **License Control:** PPC version runs optimized on G5 processors.
Win **License Control:** Support for MS-Windows XP 64 running on x64 architecture. License Control components include 64-bit binaries.

License Control Version 4.9.8.3

Release Date

Mac/Win 2006-01-16

New Features

Mac/Win **License Control:** License Database updated.

Bug Fixes

Win **Installer:** Fixed bug for dead-locked driver installation (non-english and non-german systems only).
Mac/Win **LCC:** Fixed erroneous error message, which incorrectly explained that License Server was not reachable instead of stating that connection was refused due to a problem with the PC's local date (regression bug).

Mac/Win	LCC:	Increased tolerance for difference in License Server's vs. client's time settings (regression bug).
Mac/Win	LCC:	Fixed misleading text description in License Transfer wizard's "Recovery" dialog.
Mac/Win	LCC:	Fixed missing menu title (french version only).
Mac/Win	LCC:	Fixed a problem related to License Transfer of limited licenses.
Win	LCC:	Re-activated disabled Offline Transfer wizard.

License Control Version 4.9.8.2

Release Date
