Yorkville Sound unleashes 3000-watt 21-inch passive subwoofer at Winter NAMM Show

Toronto Ontario, December 24, 2008 – The new élite LS2104 21-inch passive subwoofer enclosure delivers up to 3000 watts of bottom end support to any large-scale club or concert venue. The long excursion 21-inch neodymium driver with a full 6-inch voicecoil rear-loaded bass horn enclosure delivers a maximum SPL of 132dB in the essential 32 to 200Hz range.

Built for maximum long-term reliability, the LS2104 uses a solid 15mm (5/8th-inch) Russian birch plywood cabinet construction with heavy duty tilt wheels and all metal bar handles on bottom, back and sides.

A 1-3/8-inch stand adaptor in the top allows a speaker pole to be used to elevate a high power full range loudspeaker in club environments. Inputs include parallel pairs of ¼-inch jacks and 4-pole Speakon™ connectors.

Built for highly mobile PA applications, the Speakon™ connectors are wired to a configuration switch allowing instant reversal of pin outs for easy hook-ups using optional four wire Speakon™ cables when building complex bi-amped setups using other élite enclosures.

Essential élite LS2104 Details:

- 21-inch Neodymium Woofer Driver w/ 6-inch Voicecoil
- Handles Up to 3000 Watts (4 ohms)
- ¼-inch and 4-pole Speakon™ Input Jacks
